aequationes mathematicae is published by the University of Waterloo and Birkhäuser Verlag.
The journal publishes papers in pure and applied mathematics in general, but, in particular, papers on functional equations, combinatorics, dynamical systems, and numerical analysis. The languages in which papers will generally be accepted are English, French, and German.
Types of manuscripts that will be considered for publication include original research papers, problems and their solutions, research survey papers and self-contained summaries of papers which have been accepted for publication either by this or some other journal with a referee system. In addition, bibliographies and reports of meetings on topics of particular interests to the journal will appear from time to time. Manuscripts of papers should be submitted to the Editorial Office or to a member of the editorial board. Authors of papers should send the original and **two** additional copies. Aequationes Mathematicae normally charges a page charge of $30 per typeset page. For further Instructions to the Authors, see the inside of the back cover.
